

GRILL SUSPECT AT MORRISVILLE ABOUT INCENDIARY FIRES

Suspected Pyromaniac Ap-
pears To Be Mentally
Deficient

DENIES USING MATCHES

New State Investigator Now
Working in Bucks
County

(By International News Service)

MORRISVILLE, Apr. 14.—State Police at the barracks here today were grilling a suspected pyromaniac in connection with the burning of 55 barns in Bucks county since last June, all of which have been termed incendiary by County Fire Marshal William L. Stackhouse.

The man, identified as John Jankowski, 48, told of a strange excitement he experienced while watching 12 of the barns burn, according to Trooper John Dando of the barracks, here, who arrested him.

Dando said Jankowski admitted sleeping in the barns shortly before they burned. The trooper said the man seemed to be greatly excited and in a weakened mental condition.

Jankowski told police, according to Dando, that he arranged combustible material in the barns, some to burn fast and others to burn slowly. He steadfastly denied striking a match and igniting them, mumbling over and over again: "That would be wrong, and I wouldn't do it," Dando said.

The suspect was taken to the site of some of the barns recently burned and he showed police how he piled hay and straw so that the flames would spread simultaneously throughout the structure. He is to be taken to Doylestown for questioning by District Attorney Arthur M. Eastburn.

Both Dando and Stackhouse say they believe he is responsible for a large number of the fires.

Harry Gowan, a special state police investigator of incendiary fires, also joined the investigation today.

"He knows more about fires than many of the regular fire inspectors," Stackhouse commented. He said Jankowski, an unemployed farm hand, was much below the average in intelligence.

Miss Catharine Barr Is Hostess To S. S. Class

Miss Catharine Barr, 242 Cleveland street, entertained the members of her class of the Harriman M. E. Sunday School, at her home, yesterday afternoon, in a novel and unique fashion.

The affair was conducted in the form of an Easter Egg Hunt and afforded much amusement and delight to the participants who used all their ingenuity and much time in ferreting out the hiding places of the juicy sweetmeats. The prize for locating the largest number of eggs was received by Florence Perkins.

Various games followed, and other prizes were awarded to Estelle Morgan, Jane Godshall, Edith Hobbs, Helen Harris, and Adele Johnson. Refreshments were also served.

Attendants at this happy affair included: Doris Stewart, Dessie Hovatter, Frances Cochran, Estelle Morgan, Phyllis Patton, Adele Johnson, Helen Harris, Edith Hobbs, Jane Godshall, Florence Perkins and Miss Barr.

Cancel Teachers' Contracts Despite Edmonds Act

BETHLEHEM, Apr. 14.—Because of financial strain, the local board of education today had decided to terminate all existing contracts with teachers, principals, supervisors and other employees whose salaries are governed by the Edmonds Act.

A motion was passed over the recommendation of Superintendent William H. Weiss, who advised postponement of action pending passage of legislation now before the State Legislature, for reduction of teachers' salaries.

The board also authorized the borrowing of sufficient funds to meet current obligations for the remainder of the school term. The limit was set at \$200,000.

PARTY A SUCCESS

A card party was held Wednesday at Mrs. Hughes' home, 542 Swain street, given by the White Elephants baseball club. A pleasant evening was spent by all. The five high winners were: Robert Hughes, 752; Robert McDonald, 746; George Schumacher, 739; Lewis Hellings, 683; George Ritter, 647.

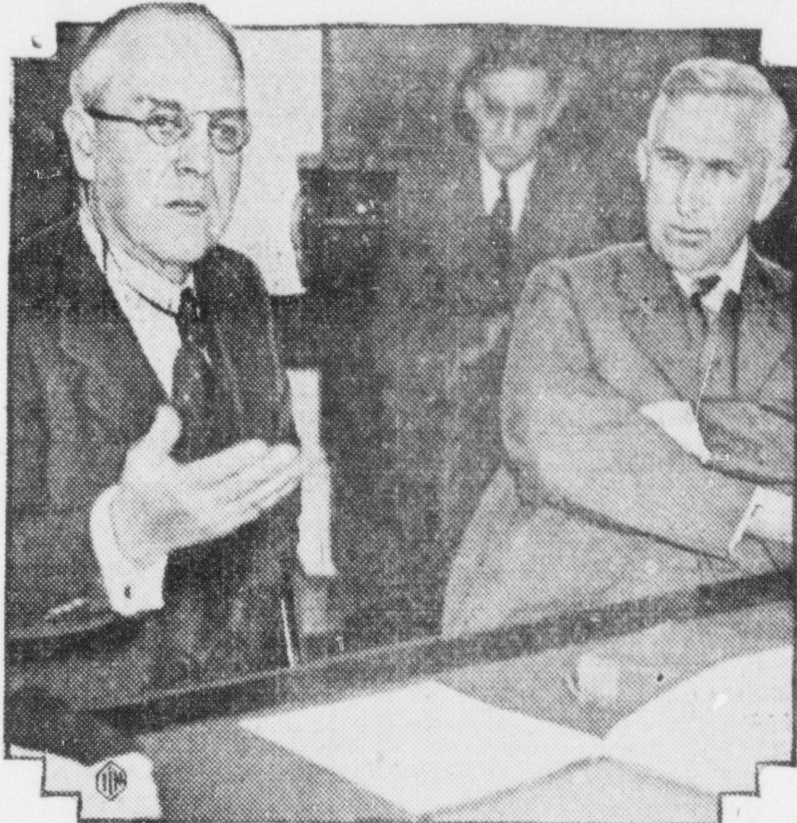

MATINEE MUSICALES

Mrs. Clifford L. Anderson, 1902 Radcliffe street, and Mrs. David Landreth, 1024 Radcliffe street, attended the matinee musicale, at the Bellevue-Stratford Hotel, Philadelphia, Tuesday.

TO REMOVE DETOUR

It is planned to remove the detour sometime today, which for the past several months has closed Bristol Pike from above Tullytown to just this side of Morrisville. Repairs have been completed to the bridge crossing the P. R. R. at Wheatshaf.

Offered Army Economy Plan

General Johnson Hagood, former teacher at the U. S. Military Academy at West Point and commander of the 2nd line of communications in the World War, is pictured as he testified before the House Committee on Military Affairs in connection with the reorganization of the U. S. Army. The general said the War Department was "top heavy" and offered a plan that would cut \$50,000,000 from Army expenditures. At left is Rep. Harry Ransly of Philadelphia.

PINCHOT WOULD PERMIT STORES TO SELL BEER

This is One of the Differences
Which Must Be Ironed
Out

EXPECT ACTION SOON

(By International News Service)

HARRISBURG, Apr. 14.—Pennsylvania will have a beer control law next week, unless another of those inter-factional political agreements goes awry.

Another coalition bill was in the hands of assembly leaders today. It will be studied during the week-end recess and will be introduced Monday or Tuesday.

The Republican organization and Governor Pinchot are in agreement on its principal features. Its passage, Capitol circles were told unofficially, also will mean the enactment of Senator John J. McClure's constitutional convention bill which provides for the election of 15 delegates at large to pass upon proposed prohibition repeal. Under the latest beer control bill drafted by the administration, retail licenses would be issued by the county treasurer, and the fee would be \$200.

These features are in contrast with the Sowers-Conners conference report which gave the licensing power to judges and fixed a graduated scale of fees ranging from \$75 for small towns to \$300 for the largest cities.

The bill stipulates only citizens of the United States residing in a community at least a year may receive licenses and they must be of reputable characters. When license are denied the applicant may appeal to the Court.

The new Pinchot bill also permits grocery and chain stores to sell beer and this is one point of difference which must be ironed out.

TO SPEAK TONIGHT

At the service to be held this evening in the Bristol Methodist Church, Paul V. Forster will speak on "The Trial of Jesus from the Lawyer's Viewpoint." The service will be at 7.45. Holy Communion will be served.

DISTRIBUTING SEEDS

Free seeds are being distributed today for the subsistence gardens sponsored by the County Relief Association.

Mr. and Mrs. Joseph McCarsen and son, Pond street, spent Sunday in Palmyra, N. J., visiting relatives. The McCarsen's left Thursday for Pittsburgh, where they will spend a week with Mrs. James Jackson.

Miss Mary Carty, 1427 Pond street, spent Tuesday in Trenton visiting Mr. and Mrs. Lester Slatoff.

JUST GOOD SENSE

Cut out the gadgets! This is no time to "fiddle" with advertising! If you want to keep going in 1933, you must spend your advertising dollar wisely; cut out the gadget expenditures.

Gordon H. Ciley, for 16 years advertising manager for John Wanamaker, says: "If you want to do more real advertising and at the same time reduce the cost of it, cut out the gadgets, cut out the knickknacks, donations, programs, tickets, charged up to 'Good Will advertising,' eliminate waste in postage and wasteful methods and mediums, spend this saving of 15% to 25% in the newspapers."

Use space in your local newspaper, convincing attractive copy, regularly, continuously! Concentrate! In the Courier every dollar you invest in local newspaper advertising goes into payrolls and comes back to you.

STRUCTURAL DEFECTS DIDN'T CAUSE CRASH

States Captain A. Heinen In
Speaking of Akron
Disaster

TELLS OF TESTIMONY

(Structural defects did not cause the Akron to crash, in the opinion of Captain Anton Heinen, famous dirigible expert, as expressed in this, the second of a series of interpretative articles on the naval inquiry now in progress in Lakehurst.)

By Captain Anton Heinen
(Written expressly for and copyright
1933 by I. N. S.)

LAKEHURST, N. J., Apr. 14.—(INS)—The third day of the testimony of the naval court of inquiry at Lakehurst gave, first, a questioning of Commander Wiley. The purpose of this questioning was to bring out through his testimony, whether the downward movement of the ship to its destruction was caused by a downward current of air or whether something which in the airplane parlance is called stalling, might have caused or contributed to the demolition.

This would seriously question the complete control possibilities of lighter than air vessels. Nothing in the testimony brought forth could be translated in such a manner and nothing could be found to indicate that the ship for any reason was heavier than about 1 per cent as it was known and observed to be. Matters of a secondary nature which might have introduced a sudden heaviness to the ship could not be brought out through direct questioning. Yesterday again it was strongly observable that Wiley at no time of the procedure was reluctant to assist with all his might the court's labors to get to the bottom of the affair.

Then followed the testimony of the engineering officers of the station, which established the fact that although the ship had suffered structural damage on several occasions in the past, this damage had been efficiently repaired and thoroughly inspected. In each case the repaired portion was actually stronger than before the damage. The press seemed to snatch at the fact that plans were in progress to reinforce certain parts of the ship's structure, indicating a fear that the ship was not strong enough for safety.

I might say here that there never was an airship built which did not need reinforcing here and there during its operating life. An efficient airship must be built with the greatest economy in weight.

I personally would not want to drive a strictly rigid airship, as elasticity is essential. As will be remembered the concrete ships constructed during the war failed just because of their lack of elasticity. An airship which must ride the even larger waves of the air would fail immediately if it were not for the flexibility of the structure. The main strain on the structural members of any airship is produced by its own propelling forces, and not by even the most turbulent air conditions.

These propelling forces are under the control of the crew. We have seen the Shenandoah fly with major damage during a really severe storm. We have seen a German warship reach port with the front end caved in. We saw an English ship come in with major damage to fins and rudders and adjacent girders.

In short we will find the solution of the Akron disaster somewhere else, but certainly not in any structural fault of the ship.

The second day of the Akron investigation brought us an interesting point. The evidence of Lieut. Commander Wiley, who was recalled as

WHITEHOUSE TRIES TO GET RELEASED ON HABEAS CORPUS

Judge Boyer to Announce
Decision in Case
Tuesday

TWO BOYS VICTIMS

District Attorney Promises
Immediate Re-arrest Will
Follow

DOYLESTOWN, Apr. 14.—A vigorous effort is being made to have Harry S. Whitehouse, 34-year-old chauffeur, Wenonah, N. J., released from the Bucks County Prison on the charge of murder. Whitehouse was the driver of the car which is said to have struck and killed two unidentified colored boys on the Lincoln Highway near Oxford Valley.

Whitehouse is represented by J. Leslie Kilcoyne, Bristol attorney, who argued at a hearing before Judge Calvin S. Boyer, yesterday, for his client's release on a habeas corpus. Judge Boyer took the matter under advisement until Tuesday.

Whitehouse, who is employed at Cottage Greens Rest Home at Holmesburg, was remanded to the county prison. If the court's decision permits Whitehouse's release, District Attorney Arthur M. Eastburn declared, the chauffeur will be rearrested immediately on a charge of involuntary manslaughter.

Details of a four-hour drinking party which started in a Trenton speakeasy a few hours before the two boys were killed were related at the hearing as the State fought the move to free Whitehouse.

State Highway Patrolman Vincent J. Coughlin, of the South Langhorne barracks, the first witness, told of finding the bodies of the victims early on the morning of April 3 and the arrest of Whitehouse as he was sitting in his damaged automobile outside the grocery store of Peter Morrow, in Morrisville, about three hours later. He stated that the glass was broken out of the windshield and headlights of the car, that the radiator was badly damaged, and that there was blood on the front bumper. At the Morrisville jail, he said, Whitehouse denied that he was drunk, and said the accident occurred when he was blinded by the lights on an approaching car.

Mrs. Emily Stidham, 34-year-old widow, of Holmesburg, who was asleep in the machine when Coughlin located it, told of the drinking party at Trenton while they were en route from Wenonah to Holmesburg.

"I admit we were both drunk," she declared during her testimony.

She stated that she had fallen asleep a short time after leaving Trenton, and that she knew nothing about the accident until Whitehouse told her that he had hit something. Later she admitted that her companion had said to her at the Morrisville jail: "You don't know anything. Keep your mouth shut."

Questioned as to why she had said after the pair's arrest that she had taken the glass out of the windshield at Beach Haven on the previous day, Mrs. Stidham admitted that she had lied to the officers, but "didn't know why."

Combating Whitehouse's claim that he was blinded by the lights of a car when he hit the boys, Amos Charles, of Oxford Valley, said he saw the victims walking along the highway from a window of his home when he was getting up shortly after dawn.

Officers who saw Whitehouse following his arrest all testified that he was drunk.

A COMMUNITY NEED

Why should not Bristol stage a campaign similar to those being conducted in many other American cities to spur property owners to the making of repairs and improvements?

In some cities organized campaigns with this as their objective are under way. Reports indicate that they are making encouraging progress. The idea is to emphasize, for the benefit of property owners, the advantage it will be to their own interests to make whatever repairs or improvements their property may be in need of while prices of materials and of labor are low.

There, of course, is another purpose to be served. Unemployment is reduced, the more work of this kind is begun and business is stimulated. This represents a part of the community value of such undertakings. But there are other advantages. Among these, as the Ohio State Journal points out in commenting on the Columbus campaign, is "the development of social and spiritual values that will live and continue productive long after temporary improvements have served their day and passed away."

There could be no better time, from the individual or the community standpoint than the present for owners to undertake the rehabilitation of their properties. Eventually repairs will have to be made whether or not the time is propitious financially. The cost then may be far in excess of what it would be at present.

Bristol property owners well might bear this point in mind. Most of them are shrewd business men and women. Most of them also take pride in their town and have at heart the welfare of the less fortunate members of the community. By having needed work done now they can save money for themselves, improve the appearance of the community and help persons deserving help.

NO CAUSE FOR WORRY

Those apprehensive souls who live in fear of the end of things should find reassurance in the testimony of an astronomer that the universe is still a long way from its integration, supposing that it is headed for such an ignominious finish.

Basing his estimate on the measureable radiation from the fiery suns and on the scientific experience that everything that burns must finally burn out, he calculates that in the stars, the last spark of heat and energy, won't flicker out for another thousand million million years.

But do not astronomers presume a little too much in applying mundane laws to cosmic behavior? Whatever process created those solar systems may conceivably be in operation today to maintain them or renew them. The origin of the universe is still far beyond the understanding of science; its maintenance may be another such mystery.

In any case, the date of dissolution is now postponed to a time where it need cause this generation no worry.

You don't have to collect bills; they just accumulate.

Nature is the same way. Most flowers, for instance, quit producing if you quit consuming.

"MARY FAITH"

by Beatrice Burton

COPYRIGHT, 1931, BY KING FEATURES SYNDICATE, INC.

SYNOPSIS

Mary Faith, young and comely orphan, is secretary to Mark Nesbit, wealthy young business man. She informs Mark that she is leaving her position to marry Kimberley Farrell, handsome young lawyer, to whom she has been engaged for some time. Invited to Kim's house for dinner, Mary Faith is greeted coldly by his mother. Later, Kim startles Mary Faith by breaking his engagement and asking for the ring. The next morning, Mary Faith informs her co-workers that she is not to be married. She asks them to take back their presents. After working late, Mark Nesbit takes Mary Faith to dinner and home to her boarding house in his car. Slowly Mary Faith learns to live her life without Kim. When Mark Nesbit injures his ankle, Mary Faith is driven to his country home to take dictation. She meets his mother and enjoys the charming home life of the Nesbits. Jean Bartlett, Mary Faith's office friend, laughingly tells her she should marry Mark Nesbit. Mark, now back at the office, asks Mary Faith to help him select a ring for his sister. In the store she sees Kim Farrell. Kim, standing with a girl, approaches Mary Faith. She greets him casually.

CHAPTER XII

Kim and his girl were still looking at mesh bags when they left the store. Mary Faith did not glance in their direction as she passed them. She never had had a moment's curiosity about the girl who had taken Kim away from her.

It was ten minutes after five by the illuminated clock in the tower of the City Bank Building when she and Mark Nesbit again stepped out into the crowd of hurrying, last-minute shoppers on Spring Street.

"I'm going to meet my mother at six and drive her home," he said as they turned west toward the garage. "So I'll have plenty of time to take you home first, Mary Faith. Unless you'd like to go somewhere and have some tea."

"No, thanks." Food was the last thing that Mary Faith wanted at that moment. "But there's no need for you to drive me home, Mr. Nesbit. I can get a street car at the next corner."

"Well, I'd like to drive you home if you don't mind—I want to talk to you." He took her arm. "My mother would like you to come out to our house for Christmas. Judy's going to a matinee with some of the girls she goes to school with, and the Grants are going down to Washington for a week, so my mother and I will be alone. She'll probably call you up about it tonight."

Mary Faith knew just what Christmas day would be like at Mrs. Puckett's. There would be little-pig sausages and wheat cakes for breakfast. Afterward Mr. McClintock would complain of indigestion and send Agnes flying for the baking-soda box. At eleven o'clock Mary Faith would go to church and that would be lovely—mistletoe and holly on the walls, candles flickering, the choir-boys singing "O, Come All Ye Faithful" that always made her heart swell and a lump come into her throat.

There would be a four-course dinner at Mrs. Puckett's at two o'clock, and later on Mrs. Puckett would fall asleep with a newspaper over her face while the Brock girls and Miss Halperin and Mary Faith played auction bridge before the fire.

At seven o'clock there would be a cold supper in the dining room and people would come in from the neighborhood to eat, as they always did on Sundays and holidays. At ten o'clock Mary Faith would go upstairs to bed; and Christmas, "the gladdest day of all the year," would be over for her.

"It's lovely of your mother to want me—" she said slowly, racking her brains for an excuse to give him for not accepting the invitation. She didn't want to accept it. It was one thing to go out to the house in Blue Valley as a secretary and quite another thing to spend the day there as a guest. "But I don't believe I can go. You see, Mrs. Puckett's a sort of second-mother to me, and I always spend Christmas with her," she went on.

"You spend every day in the year

"Mary Faith, don't you know I'm in love with you?"

with Mrs. Puckett."

"I spend every day in the week with you in your office, Mr. Nesbit."

"I don't want you in my office!" he interrupted her sharply. He swung her to one side of the wet, crowded pavement and stopped before an enormous shop window filled with Christmas toys.

"I seem to have picked a funny place to talk to you like this," he said awkwardly. "Mary Faith, don't you know I'm in love with you? My mother does. She spotted it the first day you came out to the house."

"Oh, don't!" Mary Faith was shaking her head. "Please don't go on talking like this—"

"You don't care for me, Mary Faith?"

"Oh, yes. But wait—" She wanted to tell him that she did care for him; that she cared for his friendship and wanted to keep it. . . . And she wanted to stop him before he asked her to marry him.

"I have been waiting," he said, quietly persistent. "I've known I felt this way about you ever since that night last fall when you told me you were going to be married. I must have been in love with you long before that, without realizing it. When you came in the next morning and said you'd broken your engagement it was like giving me a new lease on life. . . ."

"Wait just a minute, please," Mary Faith interrupted him. "I didn't break my engagement. I let you and everybody else think that I did—to save my face." She caught her breath and went on: "The man I was going to marry broke it. He was in love with another girl and he came and told me so. . . . He was the man who spoke to me in Armbruster's just now. The girl was with him. At least, I suppose it was the girl."

Kim had thrown her aside like a book that he had finished reading, and she wanted Mark Nesbit to know it. It was only fair to tell him the truth.

"I'll never give the snap of my fingers for anyone again—in that way," she said. "I must have given him all the love I had to give anybody."

They walked on in silence. And in silence they got into the gray car and started for Mrs. Puckett's. When they were halfway there Mark

Nesbit spoke again.

"You're very young to look at things like this, Mary Faith. One love affair that turned out badly isn't the whole show. You have a long life ahead of you, and you've got to live it. You've seen a good deal of me the last two weeks, and you've seemed to be very happy. You do like me, don't you?"

"I wish I could tell you how much I like you," she said; "but I don't feel about you as I did about Kim."

"I like him now," she thought. "But if I married him I'd probably stop liking him. I'd grow to hate him because he wasn't Kim."

There was a rich smell of vegetable soup in Mrs. Puckett's house that night. Mr. McClintock was walking up and down the hall when Mary Faith came in, waiting for Agnes to throw open the dining room doors. He lived from one meal to the next.

Miss Halperin came flying down the stairs and called for Mrs. Puckett. "Allie Brock has been taking a bath in that bathroom for one solid hour!" she complained bitterly. "And here I am, waiting to get dressed to go out to a dinner date. . . . Now, what am I going to do?"

Mrs. Puckett looked appealingly at Mary Faith. "She can use your washbowl, can't she, dearie?" she asked. "You don't mind, do you?"

Mary Faith did mind. She minded very much. But she opened her handbag and gave Miss Halperin the key to her room.

"Dinner will be ready in just a minute, anyway," Mrs. Puckett drew her into the parlor. "You'd only have to run 'way up to your room and straight down again. . . . Was that Mr. Nesbit who brought you home just now?"

"Yes," Mary Faith took off her tight little hat and shoved the heavy hair back from her forehead. "Well, it's getting to be quite a romance, isn't it?"

Mary Faith shook her head. "No, and it's never going to be a romance." All at once she found Mrs. Puckett's archness too heavy to be borne. "I stopped working for him today."

The first witness to complete and amplify his statements of the day before brought out that the ship previously did not break up in the air under the strain of a severe gust.

It gave room for a clear deduction, that the severe shock to the ship which preceded the breaking up of the after end was caused by the lower fin dipping into the sea while the airship was travelling at full speed endeavoring to hold its altitude. No other explanation now could be found which will fit so perfectly the jigsaw puzzle evidence of the three survivors.

The picture unfolds more and more and tells us a dramatic story of the greatest import, the lesson of which we will not very soon forget. It is still too early to draw definite conclusions or stake an unmistakable case against anybody or anything. However, today I have more than ever the impression that nothing will be left undone or unsaid that will throw light on the disaster, that moved us so deeply to compassion, surprise and wonder.

One fact will certainly emerge from this investigation and that is that the repetition of this tragedy can be prevented by means amply within the control of the average man. The operation of airships is not a fight or superman against the overwhelming odds of nature as the public is led to believe. I know this fact will unfold itself as the fact-finding investigation progresses in the next few days.

The court is very much aided by the witnesses called up until now. There is no evasion apparent whatever when the Judge advocate drives home his questions. Particularly apt it is that Commander Wiley and the other two survivors were stationed outside and inside of the hull proper, respectively, to permit corroboration of their observations and to check on the chronological accuracy or weakness of this testimony.

The operation of airships is not a fight or superman against the overwhelming odds of nature as the public is led to believe. I know this fact will unfold itself as the fact-finding investigation progresses in the next few days.

The court is very much aided by the witnesses called up until now. There is no evasion apparent whatever when the Judge advocate drives home his questions. Particularly apt it is that Commander Wiley and the other two survivors were stationed outside and inside of the hull proper, respectively, to permit corroboration of their observations and to check on the chronological accuracy or weakness of this testimony.

The picture unfolds more and more and tells us a dramatic story of the greatest import, the lesson of which we will not very soon forget. It is still too early to draw definite conclusions or stake an unmistakable case against anybody or anything. However, today I have more than ever the impression that nothing will be left undone or unsaid that will throw light on the disaster, that moved us so deeply to compassion, surprise and wonder.

One fact will certainly emerge from this investigation and that is that the repetition of this tragedy can be prevented by means amply within the control of the average man. The operation of airships is not a fight or superman against the overwhelming odds of nature as the public is led to believe. MORRISVILLE HIGH NINE LOSES TO FALLSINGTON

MORRISVILLE, Apr. 14.—Morrisville High's aspirations to the Lower Bucks County League baseball diadem were given a sudden jolt yesterday at Island Park as Coach Jimmy Doherty's Falls Township batmen rallied in the fifth inning to upset Stan Offner's proteges, 6-5. It was the opening game of the regional diamond season and a good-sized crowd braved the chilly weather to see it played.

The superb relief hurling of Ed Reading, who struck out eight consecutive enemy batsmen between doubles by Russ Malmbsbury in the third and fifth stanzas, featured the Falls Township triumph. The big blow in the victory was Bill Shull's triple in the fifth, which scored two mates. He eventually came in himself with what proved, in the end, to be the game's deciding tally.

Both Falls and Morrisville are future opponents of Immaculate Conception. The Golden Wave will open its season next Monday at Cadwallader Park against the Fallsington team.

WILL USE 6-INCH CUPS IN MATCH AT YARDLEY

YARDLEY, Apr. 14.—Born amid protests, the six-inch putting green cup, will be officially introduced to this golfing region Sunday afternoon.

A Nelson, Yardley Country Club professional, announced that he will have the cups installed at the Yardley course and that they will be the goals Sunday of himself, Bill Glancey, Jack Hiner and Leo Shea, in a best-ball match.

Nelson putted at the six-inch cups in a pro-amateur tournament at Marble Hall last week. He was quite impressed with them and decided to give them a trial here.

The match is expected to attract a monster crowd. While the cups have not proven popular, there is, nevertheless, a great deal of interest in them. Nelson states that he may leave the cups on the greens for general use for a week or so following the match.

The tussle Sunday should, without the added novelty of the big cups, prove of much interest in this vicinity. It is not known yet just how the foursome will line up. Last year Nelson and Shea, of the Longacres Country Club, defeated Hiner, of Hopewell, and Glancey, of the Country Club, in a series of matches.

The duel, at 2 o'clock, will probably be the first of a long line of events listed for local courses this summer with the professional quartet featured.

Mr. and Mrs. Edward McCollick and children, Betty, Edward and Joyce, Philadelphia, were Sunday guests of Mr. and Mrs. William McCollick, New Buckley street.
